Yahoo Group Archive: sierrafox

Yahoo Group summary: SIERRA FOX MAILING LIST

These Yahoo Groups messages were archived in WARC format by ArchiveTeam in 2018. This PDF was generated by Digital Library of Amateur Radio & Communications from the WARC files in 2026.

Date span: 2007-01-12 through 2017-07-13

Source WARC: sierrafox.0gIRddw.warc.gz

Source item: https://archive.org/details/yahoo-groups-2018-03-15T08-29-05Z-f129e1

Messages included in this PDF: 448

Message records with no body available in the source archive: 1

Messages omitted as spam from this PDF: 2

Yahoo replaced the domain portions of email addresses with @... in the archived messages. Characters lost in Yahoo's archived text appear as ?.

Messages are presented in ascending Yahoo message-ID order. Gaps indicate records absent from the source WARC or messages omitted from this PDF as spam.

From: exarmylosfh
Topic: 25 Message: 25

Wade, I have not been on in a while. My rig is a mobile one right now, but in the next couple of weeks I will be moving it inside. I finally have a shack in the house, :). Unfortunately when I was out and about I was unable to contact or hear any other club members. I have made some good contacts, but hopefully it will be better when I put up a new antenna and I am operating from inside and at a higher elevation.

How often do you guys get on? Is it always on 27.555 LSB? Where are most of you located in the country?

The official club frequency is 27.420 lsb, but we haven't been on there in awhile. I would say that most members would be on 27.555.

I haven't been on the radio in a few days. The swr for my base has shot through the roof. I need to figure out what's wrong.

SIGN THE ANTI-AMNESTY PETITION

'' Virtual counter-march'' petition going to President Bush. Find it here
http://www.reformus.org/

It's reached just over 131,000 since Tuesday, May 1, 2007, we need a million or more. It seems to be picking up the pace again, but it's so far off. Sign it then post it as a bulletin, email to friends, add the link to your page, leave it as a comment, post in your groups, write it on the side of your car, just pass it along somehow...

The CB band is 26.965 to 27.405 and anything out of band could get you in trouble. I seldom hear of anyone getting in trouble out of band but it could happen. 28.000 and up is the 10 meter ham band and you will get in trouble using those bands. CB band is ok to use there are no licensing requirements for CB. Here is a list of frequencies that the government uses as reserve freq. I do not believe that they ever use them but a few might be monitored. Here is a list of freeband freq. used by CB'ers and below that is a list of Gov. assigned freq. allocated for legal use.

Well from what I know you can't talk on 28-29Mhz with out a license and on the 27.555 you ain't spouse to but everybody does and that is if you are in the USA I don't know where you are at or what the laws are where you are at all you have to do is do a www.google.com search for all of what you are asking there are a bunch of web site on all of this. I hope this helps you but you have to know the laws in your area.here are some links that might help you. from 2SF2755 Brian Indy 73s

89. New Guy Checking In

Yahoo group: sierrafox
Date: 2007-10-10 21:33:09 UTC
From: Andrew Hansen
Topic: 89 Message: 89

Hi guys, I've been a member for quite some time-2SF5632, and just joined the mailing list here on yahoo. I posted in the classifieds over on the website, and I guess I'll post here too(if it's appropriate to do so) I'm in sort of a financial crunch and I am offloading some unused gear from the shack. I prefer paypal. E-mail at: rexgame@...

If you're willing to pick up from Drexel Hill, Pennsylvania, I'll drop 10 buck off the price. (Yes, that would mean the BS-1 would be free if it's picked up)

-Refurbished Uniden BC 350C Scanner in box w/ back of set antenna, wall-wart power supply, orginal paperwork/manual, mobile mounting bracket and AT002 Window Mount Antenna. Asking $40.00 shipping included.

-Diamond Antenna RH771(also sold by C Crane as CCSuper Gainer Radio Scanner Antenna). Whip for handheld. Good for 144/430MHz(2m/70cm) transmit and 120/150/300/450/800/900MHz recieve. Asking $15 shipping included.

-Refurbished Uniden BC 350A In original box w/ manual, back of set antenna, and wall-wart power supply, mobile mounting bracket. Asking $30.00 shipping included.

-Refurbished Uniden BC 350C Scanner in box w/ back of set antenna, wall-wart power supply, mobile mounting bracket and AT002 Window Mount Antenna. (no manual, sorry) Asking $37.00 shipping included.

-Garmin GPS 72 Personal Navigator. Screen has small dark spot on it, still perfectly readable, the spot is see through. Includes 4 rechargable Ni-MH batteries with charger, Quick Start Guide, Owners Manual and Reference Guide, Carrying Case. +I'm including Mapsource Point Interest (North America) CD-ROM that can load information to the GPS.(I don't have the cable needed to do so, sorry). Asking $70.00 shipping included.

-C Crane Coaxial Radio Scanner Antenna w/ BNC plug. Asking $12.00 shipping included.

-Realistic TRC-492 Navajo CB Base Station. Mic included, No manual. Asking $35.00 shipping included.

-Workmen BS-1 indoor CB antenna coax feedline included. Used in finished attic, no weather abuse. Asking $10.00 shipping included.

-Radioshack TRC-503 Mobile CB radio. Works well, missing two screws on case comes mounting bracket. Newer Super Star microphone, hardwired power cable includes new fuse. No manual or orignal box. Asking $15.00 shipping included.

From: mike
Topic: 91 Message: 91

I think we should have a special event of the 11meter band being its no license require and anybody can get on and talk and we just teach them proper radio procedure and code,and mannerism when on the Air. Im not a ham im strictly 11Meters Only.... If anyone lives in NC Near Raleigh write back to me... Thanks and Happy Holidays.... Mike (2SF431).

Mike,
I know you will be pleased with the radio, I have a 2950dx and I love it! I live in Georgia and I hear NC every once in a while. I will listen out for you. If you have any noise from the fuel pump, I think there is a filter that ford has out. The filtering of this radio has a little to be desired but overall this is a great radio.

From: David G
Topic: 113 Message: 114

The 2995dx is a 150W rado, If you use a bigger amp it must be a high drive and it must have an input of about 150 watts input drive on sideband. There is one problem with the 2995, the power supply does not last. I know about 10 people who had to replace the power supply within about 2 years. As for the amp, I have a KLV 1000p and I use a maco 200 to drive it. I get about 1600 watts out of mine. You can get one over the internet new and it will do you a very good job. As long as the people next door do not pull your antenna down?!?!?!?! That was a joke, you should use a low pass filter with that radio and/or amp to prevent TVI. Make sure the lowpass filter will handle 2000 watts. The Imax 2000 is the best ground plane you can get and it handles 5000 watts. I hope this helps you out and I look forward to a good QSO with you in DX.

A 35 amp power supply shoul be ok, unless you use sideband. I would go with a 40 or 45 amp linear power supply. Some of the switching power supplies produce noise and can hurt your recieve. A 2970 and a good power supply will do you a great job. You can google texas towers and find a good Ameritron power supply for about $200 dollars. An A99 is a good antenna, it will handle about 1500 to 2000 watts, the Imax 2000 will handle 5000 watts. I hope this helps.

>
>
> The 2995dx is a 150W rado, If you use a bigger amp it must be a high drive and it must have an input of about 150 watts input drive on sideband. There is one problem with the 2995, the power supply does not last. I know about 10 people who had to replace the power supply within about 2 years. As for the amp, I have a KLV 1000p and I use a maco 200 to drive it. I get about 1600 watts out of mine. You can get one over the internet new and it will do you a very good job. As long as the people next door do not pull your antenna down?!?!?!?! That was a joke, you should use a low pass filter with that radio and/or amp to prevent TVI. Make sure the lowpass filter will handle 2000 watts. The Imax 2000 is the best ground plane you can get and it handles 5000 watts. I hope this helps you out and I look forward to a good QSO with you in DX.

Mike,
I have the 2995dx and have had no problems with it. I understand the newer radios have improved power supplies. Mine's been going strong for 2 years now. Make sure you have a meter to check output. You will find that you won't have to turn the 'RF power' and "mic gain' controls very high to max out. A lot of operators will just max out all their controls. For antennas I use an A99 up about 60 ft. for ground wave activity, and a ground mounted Outbacker Outreach portable for domestic skip and dx. It's a 12 ft portable whip mounted on an 8 ft. ground stake at ground level with 4 34 ft. ground radials. I've worked all over the Carribean the last 4 weeks.
A good alternate power supply that I use are 2 deep cycle marine batteries with a simple smart charger. Lots of power and comes in handy during blackouts.
Hope this helps and hope to cross paths on the air.

wow thanks im actually going with the rci-2980wx and am going to get a 300-500watt amp and an antron99 antenna cant put it up to high being im stationed in the middle of a cow pasture so the lightning is crazy at times and all one of my antennas already go hit so im gunna try to put my antron in between 2trees and have it up about 5ft from the ground to the pl259 jack on the bottom of the antenna,maybe a little higher not sure and im gunna ground it with some 8gauge wire to a 8ft spike in the ground and run my coax from the antenna under ground snaked through pvc piping to my window so dad can mow the lawn and not worry about running my cable over. im gunna getting meters and the amp dont know if its gunna be base or mobile then ill run it with a power supply as a base try to save a little money,mike 2sf431

I'm thinking 40-50 feet off the ground would be best. I just happen to live in a bad housing location.. I have alot of fences, electrical lines, and a ton of trees around the house, which is making for a difficult antenna situation hehe... Just be known that this antenna is a good antenna, it just takes a large diameter mast for it to mount on, which is about the only design flaw.. the good thing is that the coax will run inside of your mounting pole, but then again, bad, because you have to figure out how to get your coax out of that pole at the bottom. I am actually using two pieces of 10' fence tubing i got at home depot for like 5$ ea. You will need to think about somethings when mounting this antenna, but for the cost, you cant beat it. Mine has been in the air for 6 months, and no problems yet.

Yeah, you have a sticky situation with the lightning, lol, im guessing you are in Florida?

And yes, the antenna has a SO-239 connector, which is what your PL-259 plugs into...

This the same antenna that is still in my inventory, it has seen many
winters up here in wisconsin and still works like the first day it was
installed 10 yrs ago. They other ants mention so far ar also okay but
they require a little maintenance after a few years because they are
fiberglass. If you want the best antenna on the market go here
http://www.a1antennas.com/ they are not cheap but Jays' antennas are
the best iv'e seen and his customer support is excellent.

Well, I don't want to rain on your parade when I say this, but in my 14 years of operating (im 27 now, lol), it has been my personal observation that a 2 pill amp might help you get out a lil further, especially if your antenna is 10' off the ground(which is kinda funny because the ground radials on the m400 will be only 1 foot or so off the dirt!)... BUT-BUT-BUT YOUR RECIEVE IS GONNA BE CRAP! The amp would be best suited when your antenna is 30' feet or higher, that way you will be able to get out, but also RECEIVE. With a antenna just 10' off the ground, you wont be able to hear as much local. DX is another story. I shoot INTERNATIONAL DX just fine with the m400 at 20' at base running 30 watts or so. That's mainly because the m400 is a 1/4 wave ground plane vertical, which means it has a low take off angle to the horizon. Both Receive and Transmit suck for me with my antenna this low as far as TALKING LOCAL, and more people can hear ME with my 2 pill as well, problem is I cant hear as far as I can transmit... BTW, I am north of Dallas by 20 miles, and can talk to FT. Worth, thats almost a 60 mile trip running barefoot.

Too many people worry about power output on transmit. This is not where it is at. It is all in your receive, and the antenna is the most important part of any system. Whats the point of someone hearing you, if You CANT HEAR THEM?

I'm just trying to let you know that you really need not worry about power, that radio will talk the globe over, I have plenty of QSL cards from Europe, to South Pacific, to South America, running a barefoot 2950 with a homemade 1/4 ground plane antenna at 40'.

Yeah, your coax PL-259 will screw right into the base of the M400. Im using a set of PDC-600's for meters. They are great!

There is one last thing you should be prepared for, TVI. Television interference is a death sentence for radio operators.The higher the antenna the better chance you will have of not interfering with the TV's next door. A low-pass filter usually does the trick. I have a KLV1000p VIP and I do about 1600 watts, I do not interfere with anyone after I put the Low-pass filter in line. I can run full bore and no one knows but me. I hope this helps.

awesome yeah im going with the rci 2995 base and probly going to use 45watts max for power but i will get that antenna up off the ground and im going with a antron 99 base antenna and im going to try to get my antenna to beable to go up and be able to take it down like a flag on a flag pole with a pulley but i dont quite know how im going to do that yet or if it can be done thank you for making night and making my decision to save $200 on an amp when i can get my receiver to monitor and my meters and coax and antenna supplies thanks again 2sf431.

xylodium24 <xylodium@...> wrote: Well, I don't want to rain on your parade when I say this, but in my
14 years of operating (im 27 now, lol), it has been my personal observation that a 2 pill amp might help you get out a lil further, especially if your antenna is 10' off the ground(which is kinda funny because the ground radials on the m400 will be only 1 foot or so off the dirt!)... BUT-BUT-BUT YOUR RECIEVE IS GONNA BE CRAP! The amp would be best suited when your antenna is 30' feet or higher, that way you will be able to get out, but also RECEIVE. With a antenna just 10' off the ground, you wont be able to hear as much local. DX is another story. I shoot INTERNATIONAL DX just fine with the m400 at 20' at base running 30 watts or so. That's mainly because the m400 is a 1/4 wave ground plane vertical, which means it has a low take off angle to the horizon. Both Receive and Transmit suck for me with my antenna this low as far as TALKING LOCAL, and more people can hear ME with my 2 pill as well, problem is I cant hear as far as I can transmit... BTW, I am north of Dallas by 20 miles, and can talk to FT. Worth, thats almost a 60 mile trip running barefoot.

Too many people worry about power output on transmit. This is not where it is at. It is all in your receive, and the antenna is the most important part of any system. Whats the point of someone hearing you, if You CANT HEAR THEM?

I'm just trying to let you know that you really need not worry about power, that radio will talk the globe over, I have plenty of QSL cards from Europe, to South Pacific, to South America, running a

barefoot 2950 with a homemade 1/4 ground plane antenna at 40'.

Yeah, your coax PL-259 will screw right into the base of the M400. Im using a set of PDC-600's for meters. They are great!

From: sean hazelwood
Topic: 138 Message: 138

Hey all,

I just joined SF and wondered why there doesn't seem to be any interest in the Sunday Chat or 11m Net. I would at least like to get the 11m Net going strong, and (with permission, of course) like to revive the Sunday Chat. If anyone is still interested, please email or PM me. I love nets, and the Messenger chat can be a blast when the band isn't open.

141. Sunday voice conference/chat

Yahoo group: sierrafox
Date: 2008-02-09 02:11:50 UTC
From: sean hazelwood
Topic: 141 Message: 141

Hey all,

I am trying to revive the Sunday voice conference/chat and 11m nets. This Sunday, Feb. 10 at 7pm CST (0100hrs Monday GMT). I am open to any suggestions, comments, or complaints. I am also looking for suggestions on the Best Day and Time(s) for these nets. Hope to hear from all members.

To Join In the Voice Conference/Chat, simply IM me on Yahoo Messenger (sean_hazelwood) and I will invite you to the conference. You do Not have to enable voice chat if you don't want, or don't have a microphone installed. The normal IM still functions. The 11m net is at the same time on 27.420mhz LSB.

From: sean hazelwood
Topic: 142 Message: 142

CQ, CQ DX!!

The Sunday voice conference/chat and the 11m net is a great way to meet and greet other members of the club. Pass along dx contacts, ask radio related questions, or just chat with people from nearly 50 Countries!! You will find CB'ers, Hams, DX'ers, Freebanders, and people from every possible walk of life! Since the 11m net is running at the same time, it's also a great way to tell everyone how propogation is doing and where! Also, if you don't like, want, or have voice chat capabilities you can IM like normal. That's 3 different modes of communication worldwide at the same time!! Plus, if the bands aren't open you can still talk with club members! And, unlike phone or mail it's FREE! Come on and give it a try, I bet you'll like at least part if not all of this plan.

For those members in other countries, I'm open to suggestions on times/days so that I can either find a happy medium for everyone or possibly have Multiple nets per day/week!

I'm still open for changes, complaints, or just plain Ideas! If you don't like something about the idea, Tell us what you DO like or want!!

> The Sunday voice conference/chat and the 11m net is a great
way to meet and greet other members of the club. Pass along dx
contacts, ask radio related questions, or just chat with people from
nearly 50 Countries!! You will find CB'ers, Hams, DX'ers,
Freebanders, and people from every possible walk of life! Since the
11m net is running at the same time, it's also a great way to tell
everyone how propogation is doing and where! Also, if you don't
like, want, or have voice chat capabilities you can IM like normal.
That's 3 different modes of communication worldwide at the same
time!! Plus, if the bands aren't open you can still talk with club
members! And, unlike phone or mail it's FREE! Come on and give it a
try, I bet you'll like at least part if not all of this plan.
>
> For those members in other countries, I'm open to suggestions on
times/days so that I can either find a happy medium for everyone or
possibly have Multiple nets per day/week!

Howdy one & all. Just joined the group. I have not been very active on 11M, lately. I hope to change than when I get around to changing my Ranger AR 3500 into a tri-band radio for the mobile. (Hopefully tomorrow!) I am a cliff dweller & really have no way of operating a fixed station.

I do have a question. Is there any prticular of the band where folks might be found operating on FM?

Thanx & 73,
Spence/2FS4263

maybe the moderators, can give the newbies here some insight on a decent antenna "sytem",it could be commercial or homebrewed other than get an They could offer advice on coax, soldering tips, and there is more to antenna efficency than low SWR. Then maybe there wil actually be more contacts,instead of people thinking they need to get an amplifier to make contacts.

Hi,

I know this isn't really radio related but I said I would give it a shot anyway!

I am doing a project for my Junior Cert (1st major post primary exam)
We got 6 options, which I chose under the heading "Design and make a working model of a buggy which automatically executes an avoidance routine when it comes
close to or bumps into an object"
I now have to generate ideas and I
would apreciate some suggestions from anyone. It has to be reasonably
cheap, reasonable easy to make and you have to be able to see the
electronic wirings. Also power source must not exceed 12V! Something strange for most of ye!
I would
apreciate any help or ideas from anyone. Thanks in advance! Oh by the
way, this is legit, asking "the internet" to generate ideas and or
solutions to the design task! Again thanks in advance!

Hello,

I'm from the 23 Division, Jamaica. I run a Yaesu FT-857 with a ATAS-120 Antenna mounted on a 20 Foot mast on top of a 50 Foot building (at sea level only a few hundred feet from the ocean) so it works good for skip talking (I made contact with Chris on 27.515 a few days back, great signal on both sides)

Will have to post some pics soon.

Hello,

I'm from the 23 Division, Jamaica. I run a Yaesu FT-857 with a
ATAS-120 Antenna mounted on a 20 Foot mast on top of a 50 Foot
building (at sea level only a few hundred feet from the ocean) so it
works good for skip talking (I made contact with Chris on 27.515 a few
days back, great signal on both sides)

Will have to post some pics soon.

Hello Wade,

His call sign was 2SF4211 - Chris from North Central Florida, between Gainesville and Jacksonville.
He was using a Galaxy Saturn with a Proton PT99 30' Feet up.
Contact Made: February 20, 2009 at 1655 EST on 27.515 with a 9+ dB Signal on his side, I was getting about 8 or so dB from him in Jamaica, W.I.

If you would like a copy of the QSL card forwarded to you just let me know.

Hope we will talk on 11 Meters soon, Wade. Conditions are starting to get better down here (got some from Arizona, Texas, and Florida a few days ago)

I'm using the ATAS-120 Antenna (Mobile Auto-Tune Antenna) for the base, However I'm in the process of building a Sigma 4 Antenna with another operator which should be done in a week from now, This should give me some better Receive / Transmit coverage for DX.

I'm on 27.420 LSB today, Got some activity but not much.

over on 27.515 we had a lot of conditions from Florida, Georgia, Texas, Virginia, and also some stations from South America and Mexico. It's great to hear some activity on the 11 Meter band.

...Back to the rig and I'm going to call a CQ-DX and see if Eagle One can copy with the conditions we have today ;-)

Hello Wade,

Did you get any conditions out of Jamaica today? We got some from Florida, Texas, and surrounding states.

That's great, Wade!. Conditions have been good so we may be able to make contact.

I'm active on 27.515 in the afternoon until usually about 8:30 PM. "363" or "23SF363" are my 2 call signs used on 27.515 LSB.

Hello Wade,

His call sign was 2SF4211 - Chris from North Central Florida, between Gainesville and Jacksonville.
He was using a Galaxy Saturn with a Proton PT99 30' Feet up.
Contact Made: February 20, 2009 at 1655 EST on 27.515 with a 9+ dB Signal on his side, I was getting about 8 or so dB from him in Jamaica, W.I.

If you would like a copy of the QSL card forwarded to you just let me know.

Hope we will talk on 11 Meters soon, Wade. Conditions are starting to get better down here (got some from Arizona, Texas, and Florida a few days ago)

I'm using the ATAS-120 Antenna (Mobile Auto-Tune Antenna) for the base, However I'm in the process of building a Sigma 4 Antenna with another operator which should be done in a week from now, This should give me some better Receive / Transmit coverage for DX.

Hello,

I'm from the 23 Division, Jamaica. I run a Yaesu FT-857 with a
ATAS-120 Antenna mounted on a 20 Foot mast on top of a 50 Foot
building (at sea level only a few hundred feet from the ocean) so it

works good for skip talking (I made contact with Chris on 27.515 a few
days back, great signal on both sides)

Will have to post some pics soon.

Hello!

I just removed the ATAS-120 Mobile Antenna from the Base Station / QTH.

Now I have a Sigma 4 vertical on the roof, Lot's more gain and power with
this Antenna!
I will be on 27.420, 27.515, and 27.555 tomorrow, Hope we have some
conditions to really test this new setup.
The Sigma was not commercially manufactured, This is a home-brew sigma 4 =)

Hello Wade!

I'm stateside for a few weeks, I have a old President Uniden and a Superstar SS-36 going as my base radios, I'm running off a 15 Foot vertical (3 foot mast, 12 foot fiberglass whip)

I will be on 27.420 LSB today, east coast around new jersey!

The superstar pushes 4 watt dead key and 20 swing.
The president uniden is 4 watt dead key and 15 swing.

maybe I will be lucky and get to work someone while stateside.

I need to get the radios out to a tech for a "checkup" but they seem to function fine to start with...

I have a 1-pill messenger that will be here in a few days (5 or 6) from a friend in CA.

Hope to hear from you! God Bless!

Date: Sunday, May 31, 2009, 5:02 AM

HELLO EVERYONE!!

I'm stateside for a few weeks, I have a old President Uniden and a Superstar

SS-36 going as my base radios, I'm running off a 15 Foot vertical (3 foot mast,

12 foot fiberglass whip)

I will be on 27.420 LSB today, east coast around new jersey!

The superstar pushes 4 watt dead key and 20 swing.

The president uniden is 4 watt dead key and 15 swing.

maybe I will be lucky and get to work someone while stateside.

I need to get the radios out to a tech for a "checkup" but they seem to function

fine to start with...

I have a 1-pill messenger that will be here in a few days (5 or 6) from a friend

in CA.

Hope to hear from you! God Bless!

Welcome! You've got 23Sf363 here (Jamaica, W.I.) I also fell off the air for a while but I'm back at it! I will call CQ today on the Sierra Fox Freq. and see if DX land has any conditions.

You said you are on the bowel, I'm barefoot (100 whiskeys) so I wouldn't stand a chance (LOL)

73's and welcome back to the best 11M group!

23SF363

oh, and the personal here is Mike ;-)

Nothing in skip land, today Try anywhere from 2:00 PM to 7:00 PM (3-5 PM
seems to be the best) local time (1900 to 0000 UTC)
for north America and south America skip..

Nothing coming in from Europe, yet.. Maybe in 2010 the conditions will be
good and making that long trip on 11 Meters might just be possible.

Thanks for the message Wane.

73's!!

23SF363

OH, BTW we had skip from Miami and Arizona on VHF (2 meters) a few days back
with a good 5/9. pretty unusual.

Happy thanksgiving from Jamaica, W.I. !!!

Nothing even on 10M today, the bands seem dead. Nothing even heard on 24.555
USB.

my QTH Country Is second division #2 im also located in staten island n.y.c. so conditions in jamacia must be different. i also have just got back on radio after a 6 year pause . it was rolling then and it still does from time to time on 27.5550 u.s.b. But the conditions havent been that great to begin with...

One thing about HRO (HamRadioOutlet) they do not sell anything that is already wide-banded for the free band! I called about a Yaesu 817 and asked if it was CAP or MARS modded, the answer "we don't carry anything that's modified for out-of-band TX or RX"

So, if you don't mind cutting the jumpers yourself it's a great place to shop but if you want it pre-modded you have to go elsewhere.

oh, and the prices are a little high for most things. I would suggest Universal Radio in Ohio (mail order, phone, online, and in-store ordering is available and the prices are a lot less) or R&L electronics.

Yes, HRO has a store in California, it's huge!! so it's great to just browse around and see what new toys are on the market.

73's!

oh and not a single station on 27.555 today! darn!!

I like to go see the item first and do the "touchy/feely" prior to going to eBay. Not always possible though.

SnipOne thing about HRO (HamRadioOutlet) they do not sell anything that is already wide-banded for the free band! I called about a Yaesu 817 and asked if it was CAP or MARS modded, the answer "we don't carry anything that's modified for out-of-band TX or RX"**Snip**

I was suprised and pleased that the used TS 50 that I got from them was alrady modified!

dang! lucky you!

Sure, used equipment might be pre-modded when HRO receives their shipment. However, I know for a fact they don't sell anything new and modded since a friend that is a licensed army MARS operator had to get a modded radio capable of TX and RX across the entire band and sure enough HRO said they don't deal with that kind of equipment.

still, when I would request R&L or Universal to mod it they would for a light, modest fee.

73's!
23SF363

btw, HRO is still good considering you can visit one of the stores and see what your buying or look at the new toys coming in from iCom, Yaesu, Kenwood, etc. this year...don't expect RCI and Cobra, though...hi hi.

Almost nothing. Texas was in yesterday on 27.385 LSB but it was weak and didn't last. We had Washington, Oregon and Montana on Saturday during the morning and early afternoon. Pretty strong for a while. Nothing on 555 USB. Dead.

I am sorry but that so called expert does not know his head from his ass, he has no clue about anything including CB radios. He is just a drunk dumbass thinking he can put down ham radio. It's idiots like him that give everyone a bad name. He thinks he can talk all over the world, with the right conditions he can, but I can do it anytime of the day with my equipment, so he needs to just shut the hell up about stuff that he has no freaking clue about. He is probably one of those guys that are not smart enough to obtain an Amateur Radio License either.

Sorry if this offends anyone, but I hate assholes like that.

That guy in the video is a stupid asshole..

Talk anywhere in the world? sure, if you have a EXTREMELY good band opening.
That guy has obviously never even been on 20M, 40M, OR even 80M.

On those bands a HAM can work the world QRP (5 WATTS or less) easily.

oh...and did I mention 5 WATTS?!?! .....a stock 148GTL at 4WATTS on 11M
without any band opening or conditions isn't going to go very far, hell even
with a 6 Pill Box and a 3 Element Yagi you are lucky if you can get 200-300
Miles with zero conditions.

I'm not saying CB isn't fun, but when you have no 10M conditions you can
fire up the radio and hit 40 or 80 Meters with 5 WATTS QRP and throw a 5/9
to Europe on CW....I guess some people just don't see HAM as being any fun
:-(

....I'm proud to be a dual-user (CB'er + HAM) :-)

What's up Sierra Fox. I have been off the air a while and just picked up a uniden sidebander mobile rig. im going to make a wire dipole this weekend in the garage and hook it up to see how it talks. it has a funny switch on the back tied onto the final coil and the power supply with a small circuit board patched in. dont know what the switch is for maybe second final or an extended channel mod. we'll see. want to work sideband eleven meters barefoot. hope to work japan, russia, alaska, canadia, and points nw and se from spokane washington usa. i have a wall ready for qsl cards up already in the shack. pray for skip. any can-am dx clubs around? i am only 90 miles from canada. that might be a realistic first goal. canada or alaska. hmmm.

265. 38 special complete

Yahoo group: sierrafox
Date: 2010-03-29 07:02:45 UTC
From: radiostaticdeluxe
Topic: 265 Message: 265

finished the wire dipole cut for channel 38. hooked it up and heard some cqs down in the moise and some locals cussin it up on ancient mariner side down by channel 1. cant tell if i'm putting out anything intelligible because my scanner doesnt tune down that low. lights dim on the s meter on the uniden grant but im not sure if its working. no watt meter yet. thanks for all the responses guys. i call channel 38 because im locked into the stepped vfo of the cb rig. doesnt do ten meters someday maybe ill get a ranger and do three bands but i picked this up at a yard sale for eight bucks. more later

266. more on the 38 special dipole project and used rig

Yahoo group: sierrafox
Date: 2010-03-29 15:44:26 UTC
From: radiostaticdeluxe
Topic: 266 Message: 266

my call is 2SF45. Forgot to post that before. I called CQ and listened for a few hours sunday afternoon-eve, heard a few scratchy cqs but never had a response. Im pretty sure my swr is okay but I dont have a watt meter to check it. The lights on the meter dip when I transmit so I know its sucking some power for something and I can hear some general noise from being close to an active transmitter in my scanner but my scanner doesnt cover the cb band. So all that being said I dont know why nobody can hear me. This is a yard sale rig. An old Uniden Grant with the buttons in the middle of the face. The needle doesnt swing much on modulation mode but the lights do dim. I have a DMM but I wouldnt know where to poke it to measure the output. any help advice is welcome. Hope to work some dx on 38 lsb.

Well, not that I've been able to contact any of you all but just as an FYI I am rebuilding the station after a move to another part of town. My space is a bit more limited so instead of the horizontal wire dipole I'm building a homebrew vertical tuned for Ch.33 LSB. I have also started my own group called Can-Am Sidebanders DX Group for operators here in the Pacific Northwest. I will still keep checking for activity here on this DX group periodically. Have fun surfing the waves dude.

Don't worry, you can work the turkey and stuffing off by TX'ing or RX'ing!

Cooked a duck for thanksgiving in Jamaica this year...Yum! We couldn't get
the good old butter ball in time so we made a good substitution...seafood
and duck.

Weather has been nice, still in the mid 80's and no rain for a while now.

I will be monitoring 27.420 for some DX, the band has been getting better
(talked to Australia a few months ago with 50 watts on the vertical~!!!!)
over the last three years the band has improved dramatically! .

73's!

Don't worry, you can work the turkey and stuffing off by TX'ing or RX'ing!

Cooked a duck for thanksgiving in Jamaica this year...Yum! We couldn't get the good old butter ball in time so we made a good substitution...seafood and duck.

Weather has been nice, still in the mid 80's and no rain for a while now.

I will be monitoring 27.420 for some DX, the band has been getting better (talked to Australia a few months ago with 50 watts on the vertical~!!!!) over the last three years the band has improved dramatically! .

73's!

I might suggest something higher in frequency (if you can do it).

I feel bad, but I forget the SF calling freq. I know it is not standard... something like 27.560 on 27.570. Hopefully Wade will chime in on this one.

That said... the international calling freq on 11 meters is 27.555 USB (The triple nickel). This being the 2nd recommendation after the SF calling freq.

As a 3rd option... 35 USB sounds good as it is not actively used for SSB contacts.

I might suggest something higher in frequency (if you can do it).

I feel bad, but I forget the SF calling freq. I know it is not standard... something like 27.560 on 27.570. Hopefully Wade will chime in on this one.

That said... the international calling freq on 11 meters is 27.555 USB (The triple nickel). This being the 2nd recommendation after the SF calling freq.

As a 3rd option... 35 USB sounds good as it is not actively used for SSB contacts.

Haven't been able to make contact with anyone on 27.420, or 27.555
I'm sure my RCI2950DX is on frequency.
Anyway, been hanging around 36-40 lsb, lots of skip during the day, but way too much traffic. Can't get a word in edgewise. Get a kick out of the rednecks and brothers competing on 20-30 AM. lots of local lsb'ers, and AM'ers on air at night. My QTH is metro Cleveland, Ohio. Anyone else in lower Great Lakes area? Usually don't have much time during the day, busy at work. Skip not good at night , lately. I'll keep at it, bound to contact someone sooner or later. Taking Technician exam later this month. Already set with a couple 10-11-12 meter radios, and a decent vhf rig. Hope to have a good QSO with the group soon.

Welcome to the group, Greg. I've got a RCI 2950DX too. I've heard plenty of S. America today on 27.555. I'll leave my radio on 27.420 lsb on my short road trip this evening from 6:30 pm till about 9:30 pm. Central time. Hopefully, we can make contact.

Hello Greg : Welcome. There's been a lot of DX on the upper frequencies, 27.555 USB & 27.4250. Conditions have been favorable, but with the storms weve been having, it's in & out. I run a multiude of gear. My Main Radio is a RCI-2995DX, and a RCI-2980WX. Just to name a few. MY Antennaes are a Maco 3 Element Beam on the horizontal side, with an IMAX 2000 stacked over the top of the Beam. Does the trick. I monitor 27.3850 a lot, but run 27.4200. We'll be listening for you and calling you as well. Take care. 73's

2SF271. John. N.E. PA.

OK. I finally have everything in order. After getting my radio p/s fixed, a tree limb took down my antenna coax. All fixed. Monitoring 27.420 tonight. It is now 1015 pm EST. Will be switching back and forth to 38, to chat with my local homeboys. Lots of good dxing on 38 the last couple days. Had a good 2 minute contact from Cocoa Beach, FLA tonight on my Dx 959 mobile. If there is a specific time, or night that I should be monitoring the club frequency, please let me know. Happy dxing.

Topic: 350 Message: 350

I talked to 2SF360 on 27.455 lsb tonight. We were only about 15 miles away from each other, but there was too much qrn out there for good contact.

We met face to face for the first time yesterday. He stopped at the Flying J truck stop, and I drove down to see him. He joined the club about 12 years ago, and it was nice to finally meet him.

G'day, new here and just seen this message, but can't see a link to the website.
Cheers,
Mike.

hola!

I hated taking money from my parents this makes it impossible for me to fall behind I kept telling myself things would get better.
http://gelmansingapore.com/breakingnews/50StuartHarrison/ ive been crowned with success maybe this can help you.

ttyl!

373. Newbie says howdy

Yahoo group: sierrafox
Date: 2012-08-05 20:19:13 UTC
From: cgearhar
Topic: 373 Message: 373

Hello everyone. I recently found the 2SF website and thought I'd join. I've often heard folks on SSB calling out Sierra Foxtrot blah blah blah and never really knew what it was about until I found the website.

I've got a base station consisting of a Uniden President Grant connected to an attic dipole. I've also got two other antennas that are outside, one a 43 foot vertical and the other a G5RV oriented North-South. I really thought the vertical would be my best option on CB SSB because it works great for Europe on my ham radio. However I never seem to hear much with it when its connected to the Uniden!

I just ordered the new Uniden 980SSB for the car. CB Radio magazine gave it a decent preview (not a full review...that's supposedly coming out soon). It has a very low profile and I liked the looks of it so I said what the heck. I'll be using a Wilson Little Wil with it.

Hope to catch some of you on the radio one of these days.

Chris in CT, 2SF04

Welcome Spencer!

I also have a G5RV outside for CB & HAM use, Great antenna! I only run 100 watts, but I've stations around the globe with this little setup.
Oh, I had a Uniden base but sadly I sold it (stick kicking myself for doing that!!) Nice radio that's built like a tank!

Hope to hear you on the air!

Mike

Too busy on that freq. Want to try 27420 LSB?

Just because you're paranoid doesn't mean that they're not out to get you.

I'll program that freq in the scan and give it a shot. I have a vertical antenna set up so I really have to rely on good conditions.

Just because you're paranoid doesn't mean that they're not out to get you.

Regretably Jeff the culture you're hearing has taken over completely and there is nothing you nor the FCC can do to stop it.

What you hear on Ch .19 and on 38LSB (27.385) is what motivated me to study for,and then get my HAM license. I haven't looking back since. Now granted there are some on the HAM Freqs who are rude, crude, and harsh but they are further & fewer between.

Didn't solve your problem I know but at least its a response.

Hello,

Just a few words to present myself, I am Nicolas, 42, recently joined as 14SF121. I live near Paris and as the area is not really favorable for DX radio and even less for local contacts, I will mostly use my equipment aboard my car when in a clear QRM free place. Some day I will move to another house which is ideally placed and where I would set my base antennas and station.

Maybe we would meet on air one of these days.

73
Nicolas.

Hey,

All you sophisticated former Chicken Banders now turned ham operators, <grin> does anyone here ever get on 27.420 to freeband anymore? I've been trying to raise someone now that the conditions are ripe but to no avail.

Glad you're enjoying your ham tickets, but I'll take the cussing crazies (lots of 'em here in @!*%!! Phoenix) over losing my ability to, ah, "legally" freeband anymore.

Thanks,

Alex SF1687

Yeah, must admit I did too. Have had my license a year now. Look me up on QRZ.com if you like.

I also became a ham awhile back but I still have friends on 11 meters and I still talk there. I still try on 420 for anyone in the group but nothing heard in awhile but will keep trying. SF62 N6MXE Jack

I still check every now and then but have yet to make a contact with another club member. Will keep trying.

PS - Crow is not a bad meal once you get used to it...
